

Distributed Resources Delivering Grid Services

July 2026

Voltus Builds Capacity by Creating, Aggregating and Operating Distributed Energy Resources

CAPACITY & GRID SERVICES

Grid Operators · Hyperscalers · Corporates · Utilities / Co-ops

MARKET - CONNECTED PLATFORM

voltus

FLEXIBLE CAPACITY

C&I · Residential · Data Centers · Storage

SPEED TO POWER

5

MONTHS

Average time from first outreach to live in market for a Voltus MW

Voltus Resources are Dispatched Daily

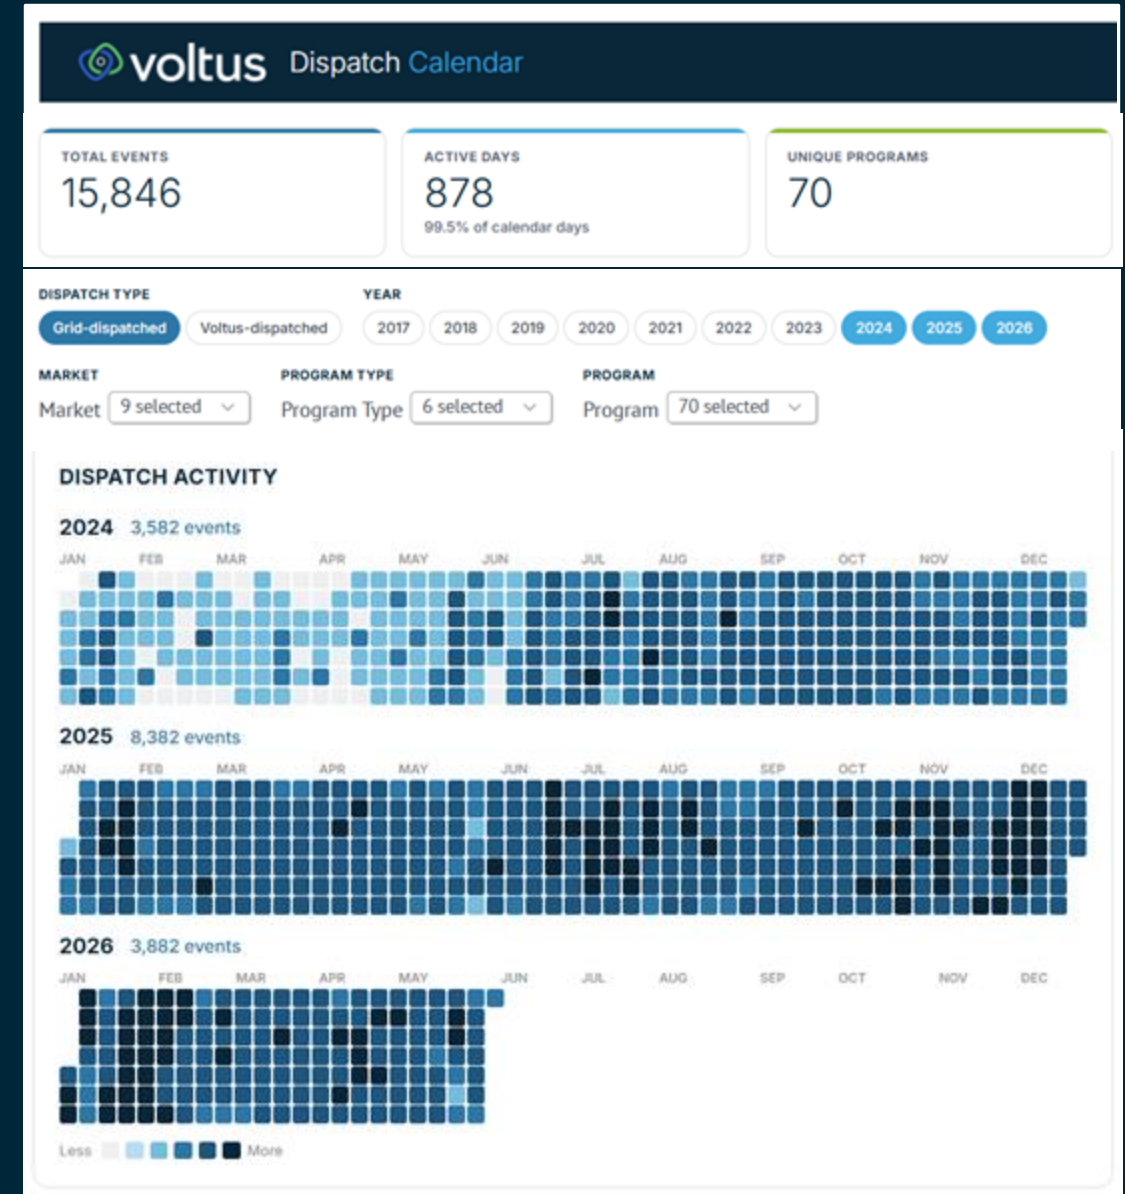

Providing capacity, energy, and operating reserves to grid operators and utilities across the U.S. and Canada

8.5 GW

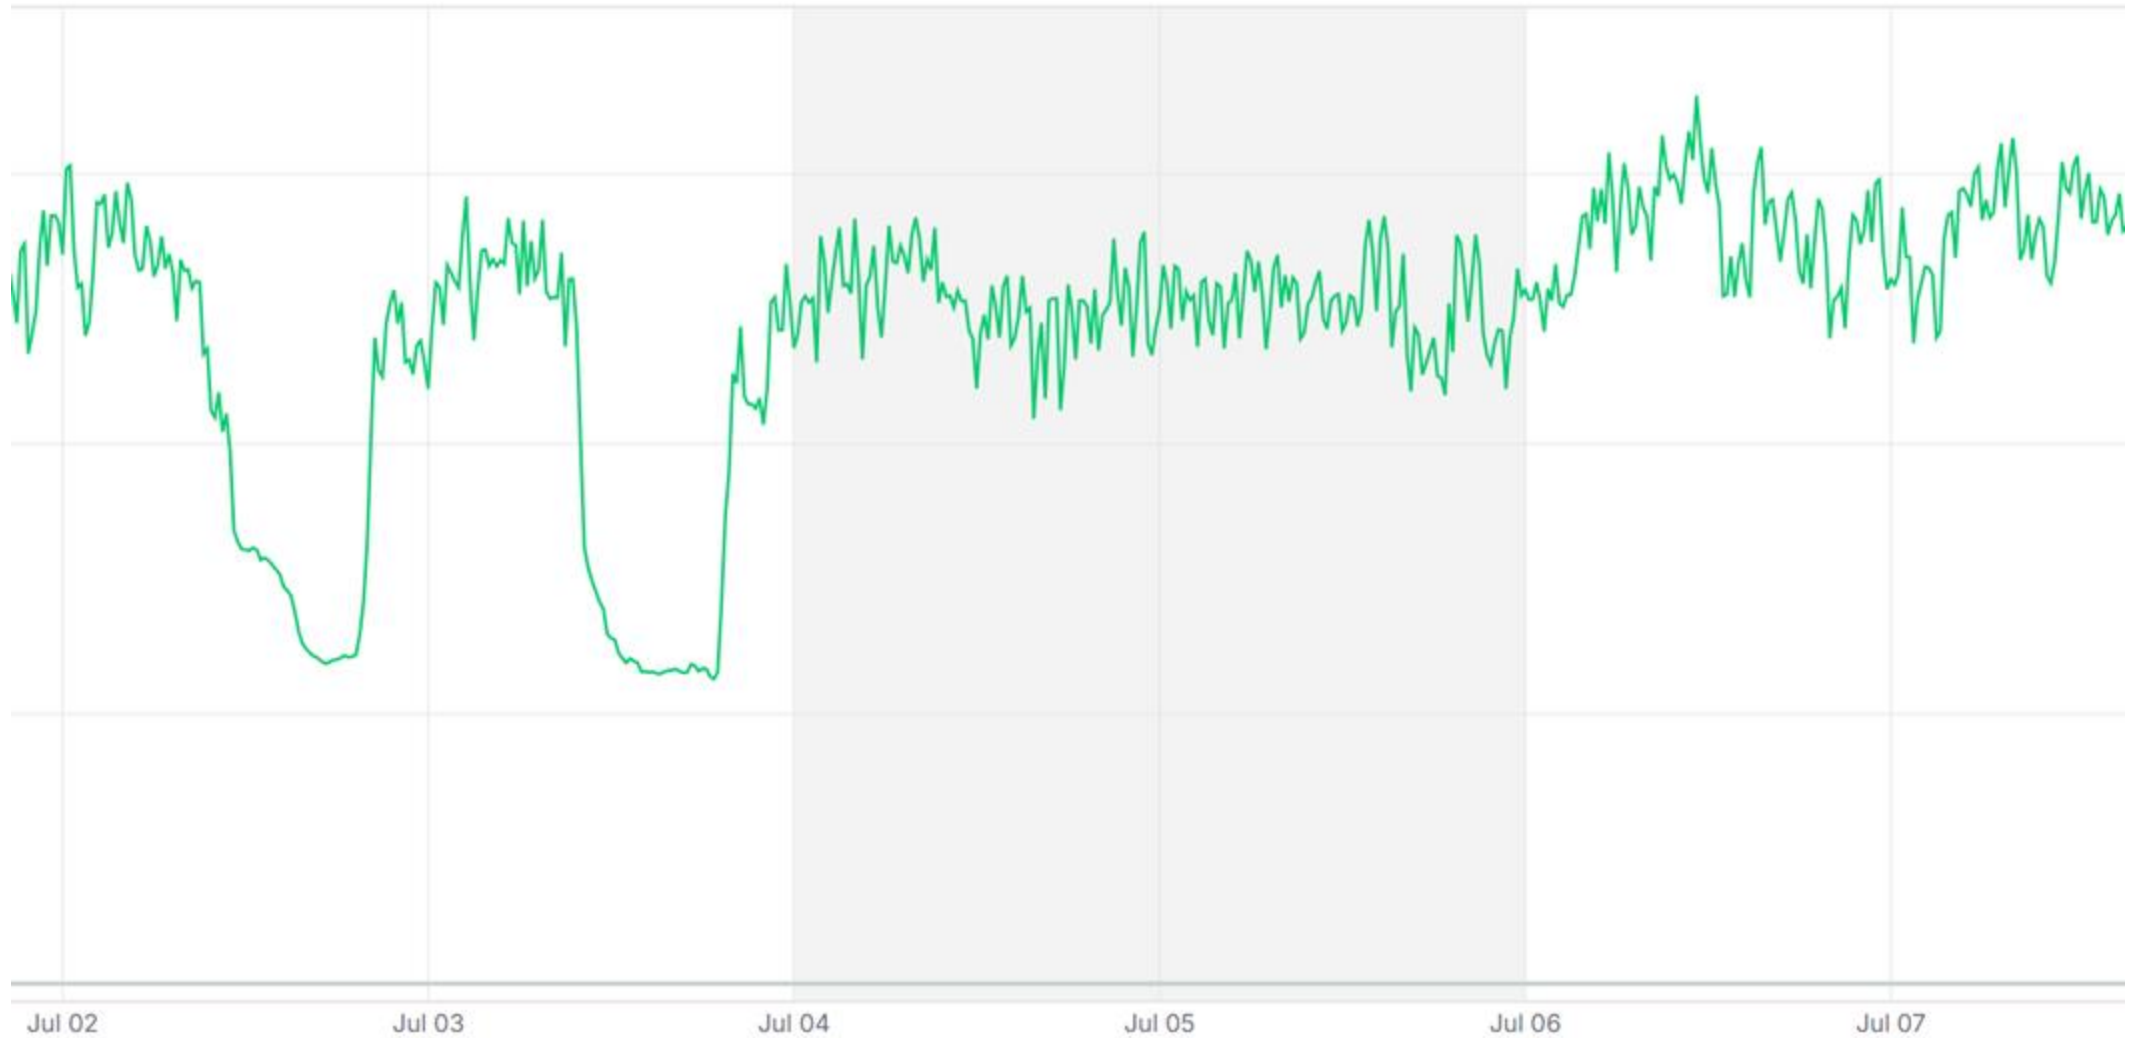

of distributed energy
resources under management

4,800

C&I sites, and a growing residential
portfolio

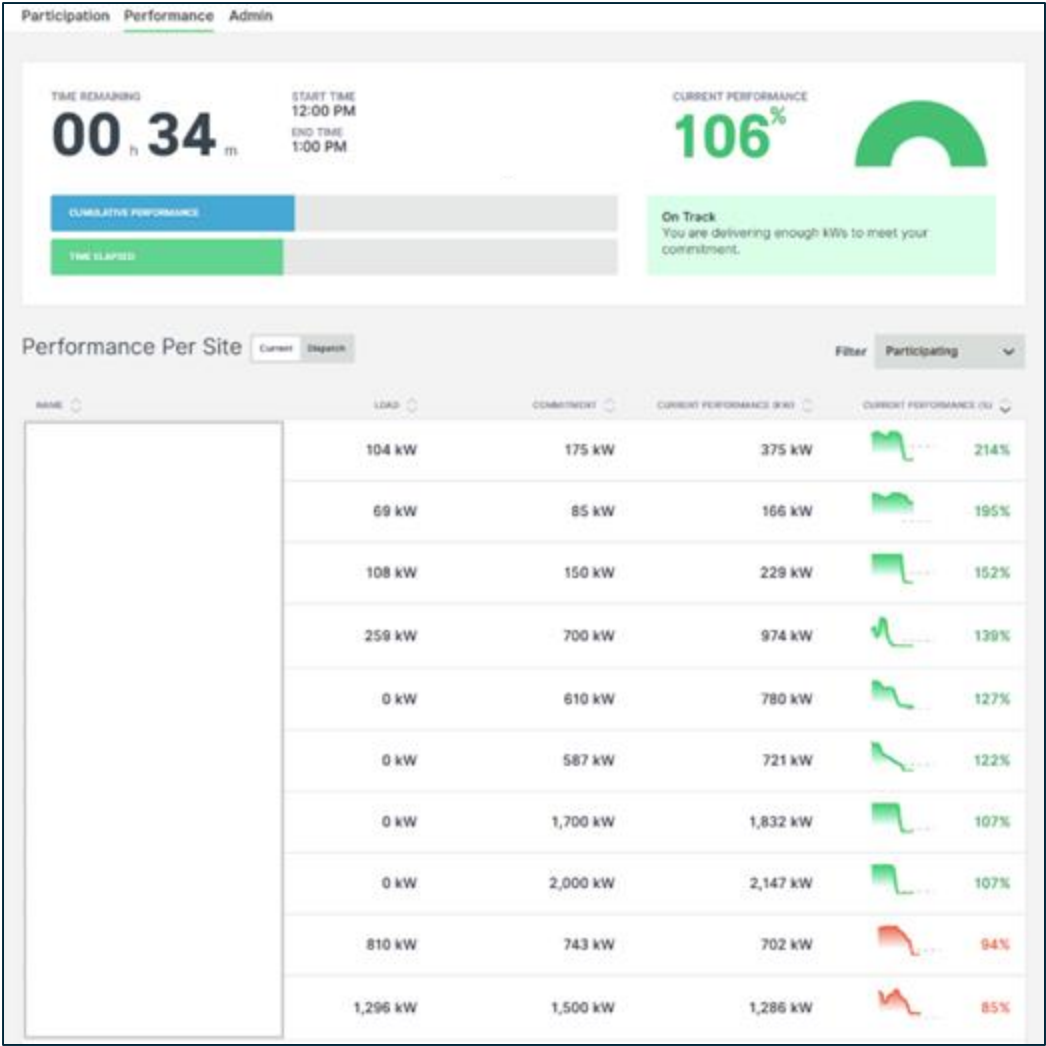

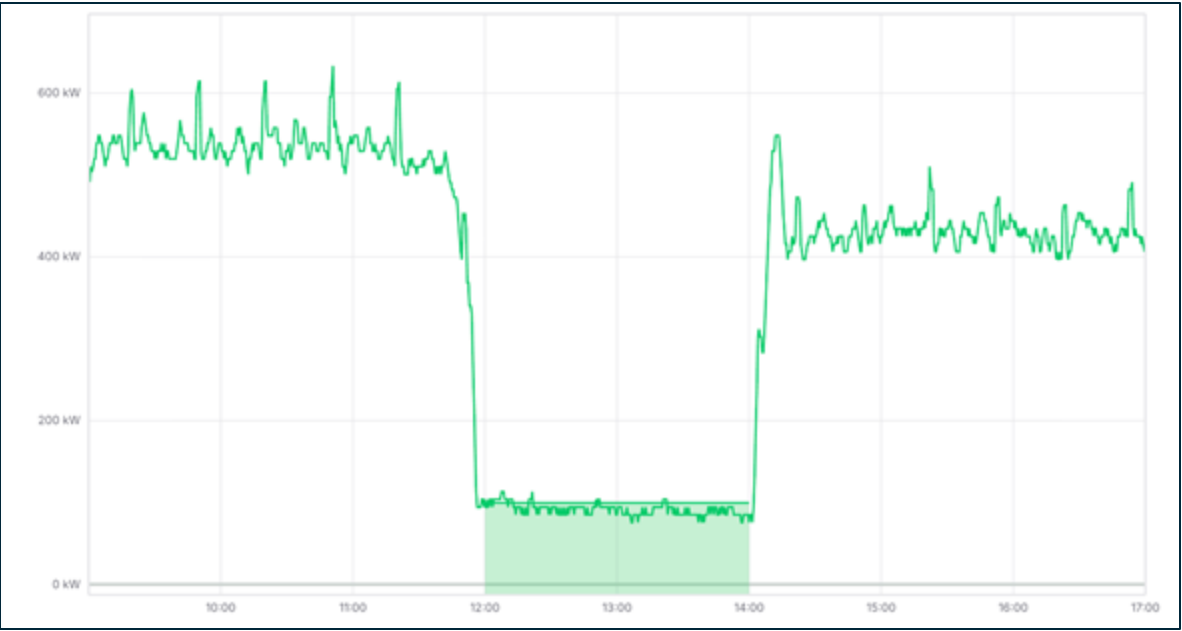

PJM: 2026 July “Heat Dome”

Under the hood: performance monitoring at both site and portfolio levels

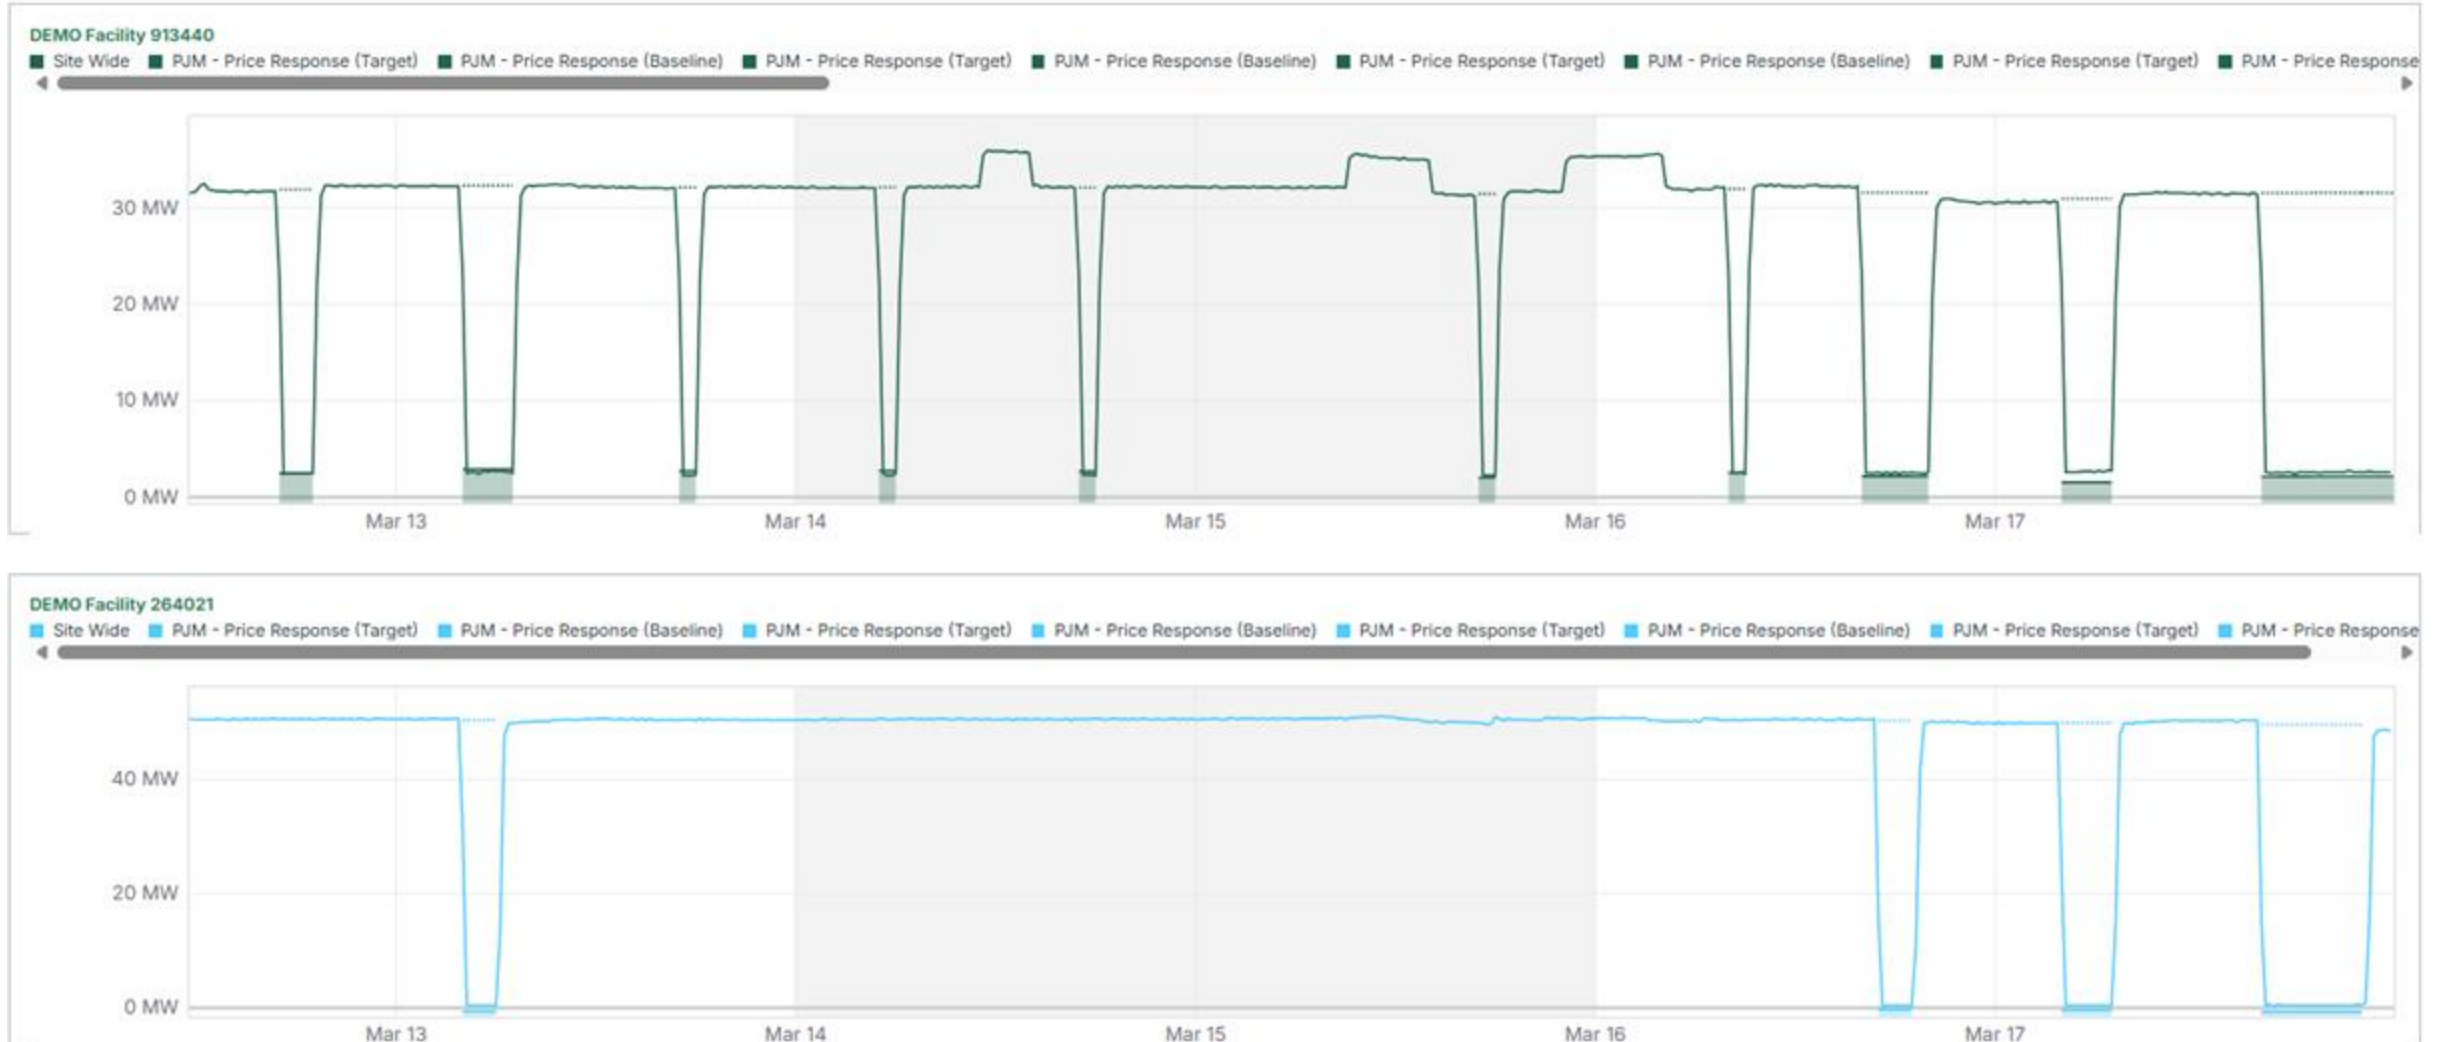

Real-time energy data into site-level consumption and dispatch performance.

SPP: Operating Reserves

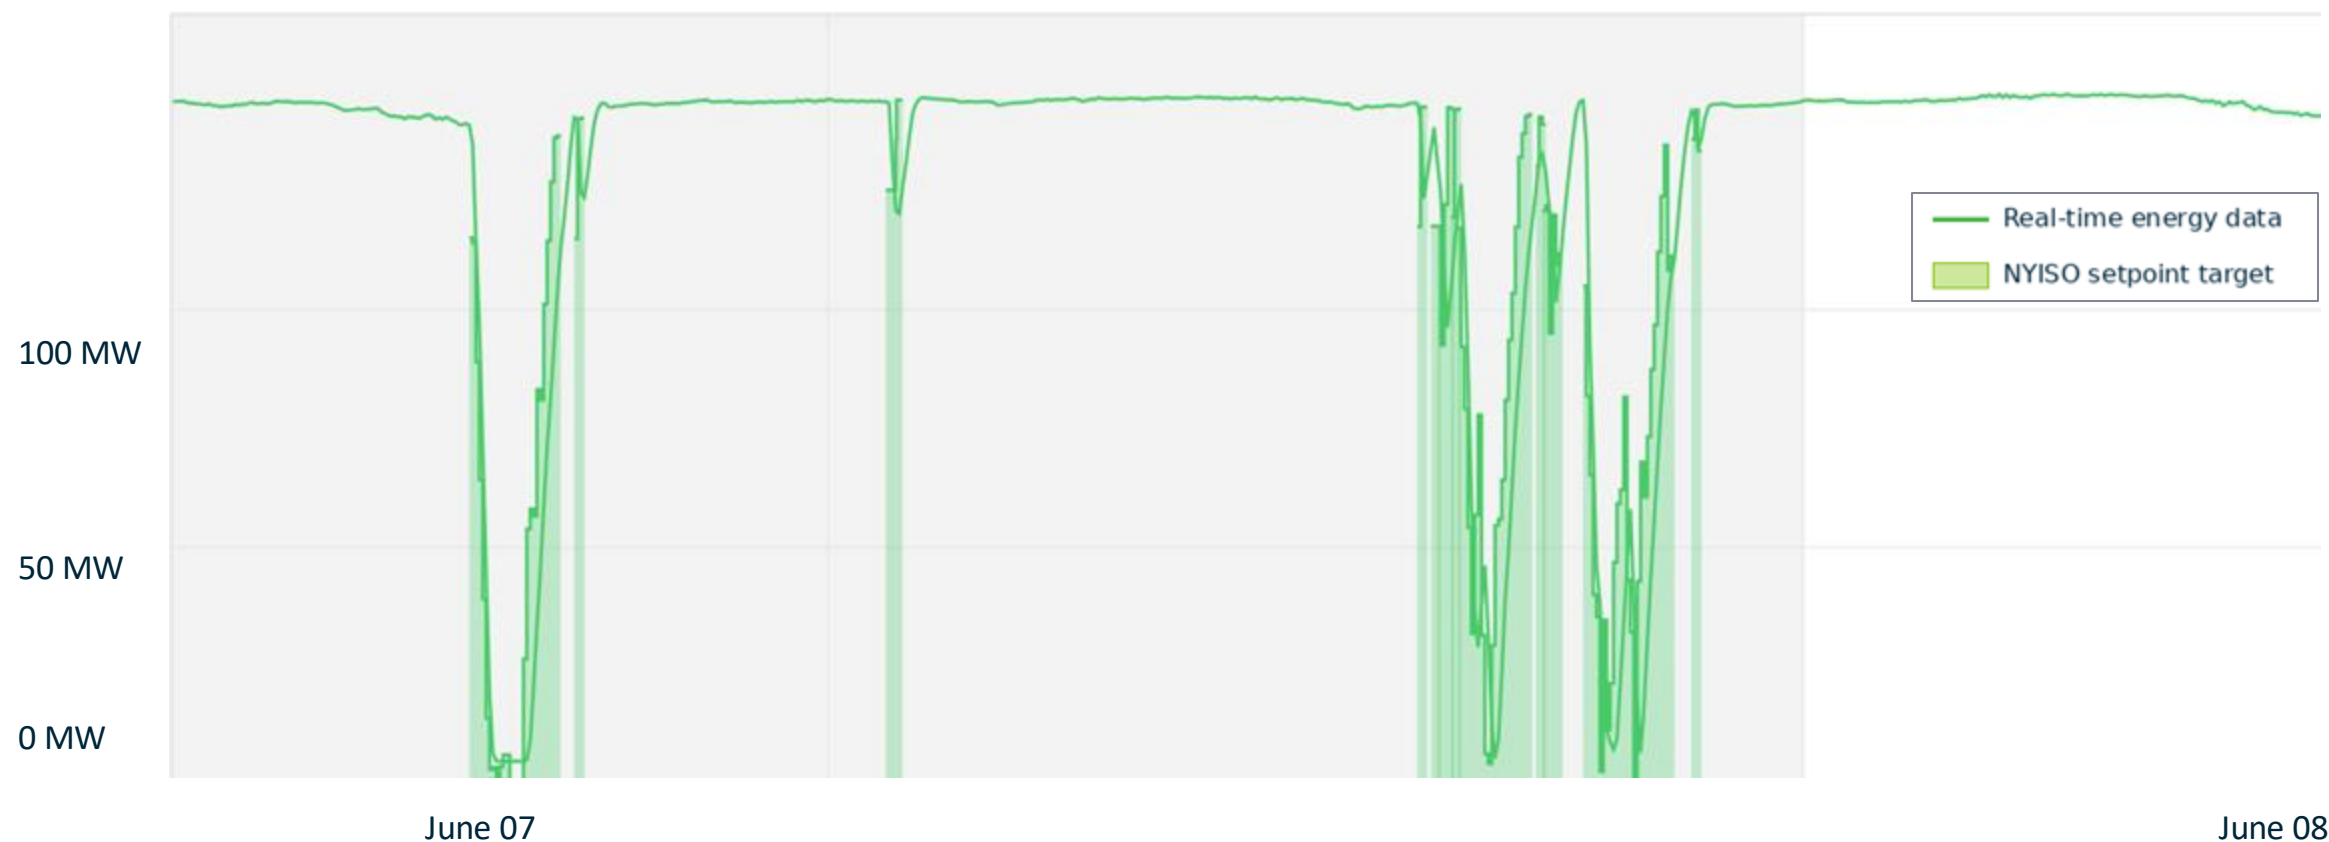

PJM: Flexible Large Loads

NY: “DER Model”

New model for DERs requiring direct integration with Transmission Operators. Two-way streaming, 5-minute set-point following, and 6-sec telemetry data for more sophisticated market participation.

Driven by resiliency and affordability concerns, customers increasingly are turning to batteries
